## Summary

Full Stack Web Developer (University of Washington 2022) with a background in HVAC and Customer Service. Looking to improve user experience on the web; detail oriented, data driven, with a certificate in full stack web development. Worked in a team of four to develop a node.js application that allows a user to save all their hobbies to their account and view all other users and their hobbies. My extensive customer service experience and time with HVAC user interface will give me a unique perspective to bring to the team. Looking forward to discussing this in more detail with you soon. Thank you for your consideration.

## Technical Skills

**Languages:** HTML, CSS, JavaScript, Node JS, MongoDB, mongoose

**Applications:** MySQL, Express, Sequelize, Bootstrap

## Projects

### HobbyHub

<https://github.com/Billygm/HobbyHub> | <https://hobbyhub10.herokuapp.com/>

- HobbyHub is a web application that provides users with the ability to log and share similar extracurricular interests.
- I focused on getting the routes and controllers working for this project.
- JavaScript, CSS, Handlebars, express, Sequelize, MySQL, Bootstrap, node.js

### Sweata-Weatha

<https://github.com/Billygm/sweata-weatha> | <https://billygm.github.io/sweata-weatha/>

- A fun app that allows users to search for a city and displays a gif based on the current weather conditions.
- I worked on the JavaScript for this project
- JavaScript, CSS, HTML, Giphy API, Weather-Ninja API

### Weather-Dashboard

<https://github.com/Billygm/Weather-Dashboard> | <https://billygm.github.io/Weather-Dashboard/>

- A 5-day weather app with access to multiple cities. type a city name and see the weather data for that city.
- Solo Project
- JavaScript, HTML, Bootstrap

## Experience

### **HVAC Service Tech**

2019 – 2021
